

# The problem of labour exploitation in NHS medical supply chains

Lihani du Plessis (ld547@cam.ac.uk), Jonathan Cullen (jmc99@cam.ac.uk) Resource Efficiency Collective, Department of Engineering, University of Cambridge

Eliminating labour exploitation and implementing decent work in the medical product industry can break the cycle of intergenerational poverty by providing a safe and dignified source of income for people in low-and-middle income countries

## Background

Clean Gloves, Dirty Practices: Debt Bondage in Malaysia's Rubber Glove Industry

Migrant workers in Malaysia risk forced labor making gloves for American healthcare giants.

> UK investigates supplier of NHS PPE over alleged use of forced labour

## Metal Exposure in Child Workers Assessing Hazards in Surgical Instrument

Manufacturing Workshops

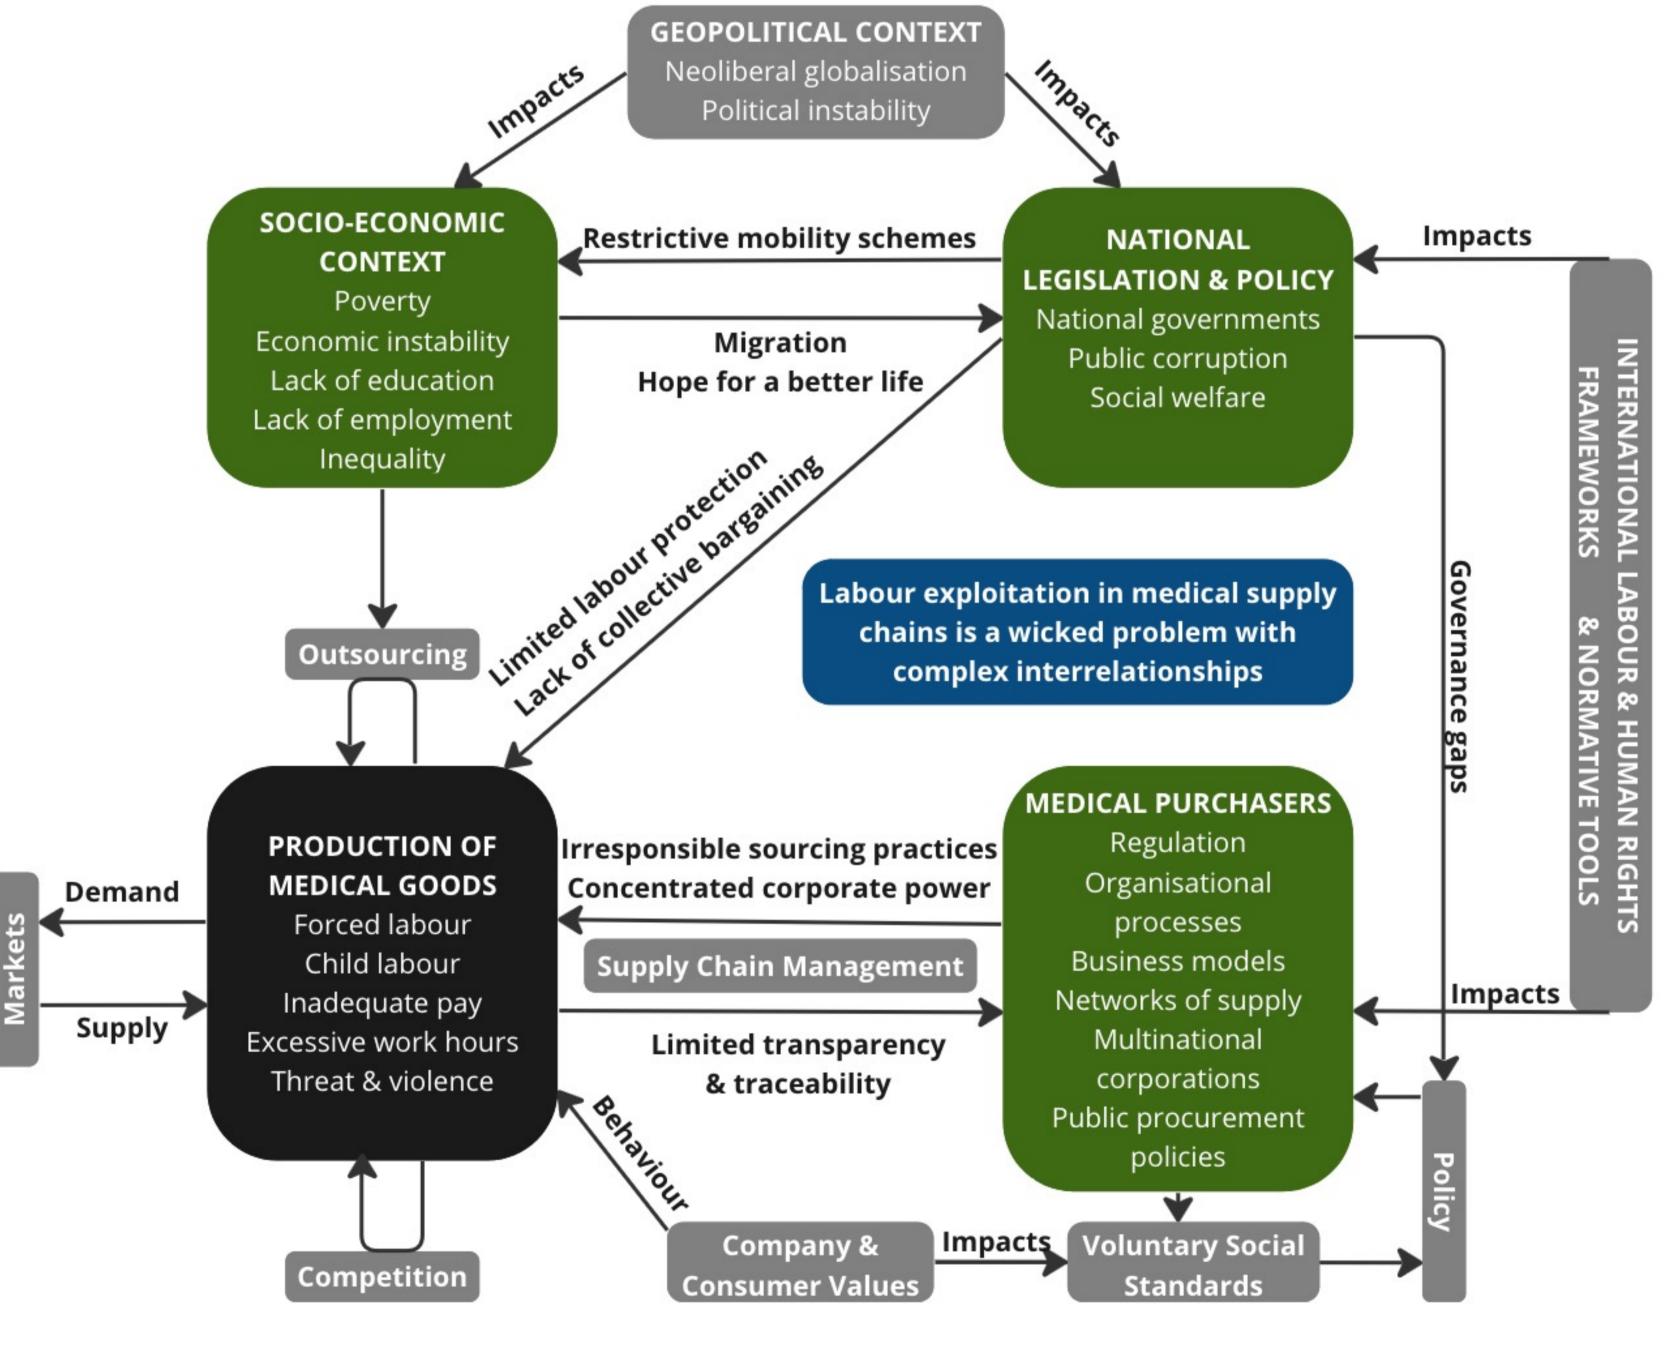

18.7 million forced labour victims globally

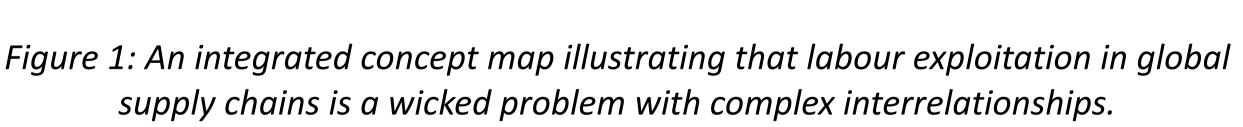

Labour exploitation is present in the NHS medical supply chains

Current risk management policies are ineffective

Lack of empirical research

## Labour exploitation is a complex, systems-level problem requiring inter-disciplinary research

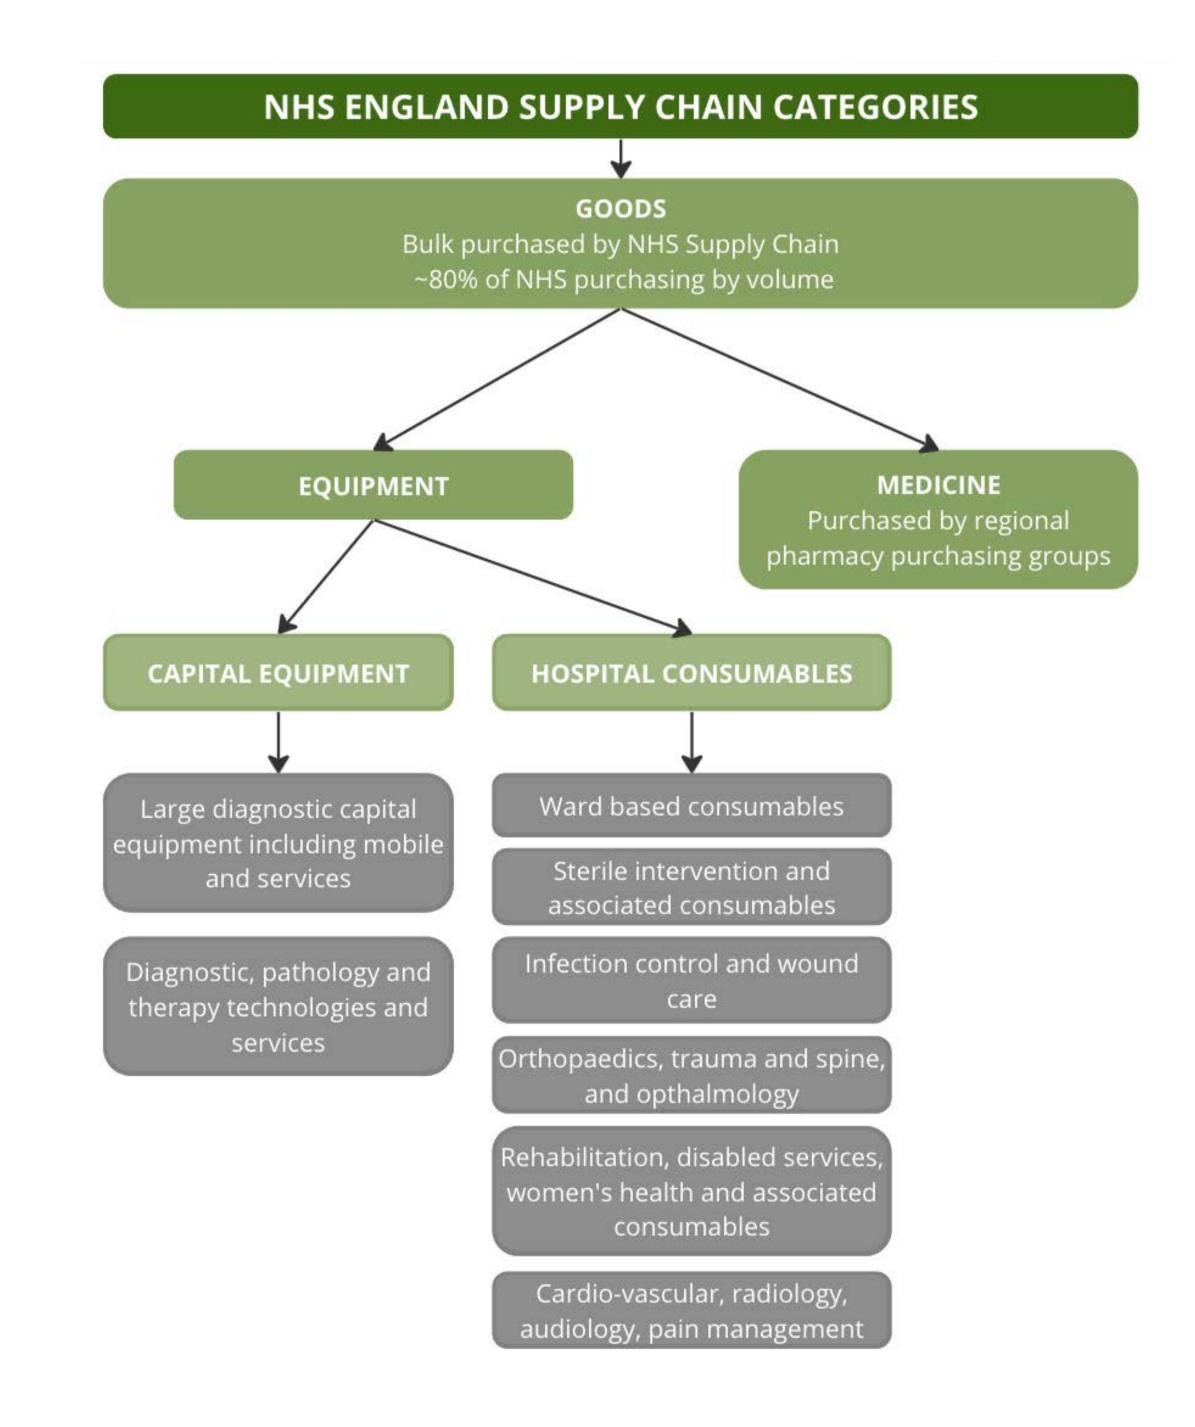

Figure 2: NHS England supply chain purchasing categories for medical goods

### How can we design medical supply chains to be free from labour exploitation?

#### **EXPERT INSIGHT**

Understanding the NHS context

### **SUPPLY CHAIN MAPPING**

Identifying the risk of labour exploitation embodied in the NHS medical supply chains

### SYSTEMS DESIGN

Identifying opportunities for intervention to re-design the NHS supply chain system to be free from labour exploitation.
